

Unleash The Power!

Installing and Running Ad-Aware

To Install the Ad-Aware software, perform the following steps:

1. First go to the following website: <http://www.download.com>
2. Once you're at that site, type Ad-aware into the search field and hit your enter key.
3. Ad-aware will pull up. Click the link "Download Now".
4. When the "File Download" window shows up, click on "Run".
5. Wait until the download finishes and then click on "Run". This will start the install.
6. When the install starts, hit "Next" 4 times. You should then see the files install and then you can click on "Finish". Ad-Aware is now installed.

To Run the Ad-Aware software, perform the following steps:

1. Open Ad-Aware by double clicking on the icon on the desktop.
2. When the program loads, click on "Check for updates now" just above the "Start" button.
3. If a new reference file is available click on "Ok".
4. When the update is complete, click on "Finish".
5. You should now be back at the main screen. Click on "Start" and then "Next". The program should now be scanning your system to remove all spyware.
6. After the scan is complete click on "Next".
7. On this screen you should see all of the items that need to be removed. If they are not all checked right-click on one item and left-click on "Select All Objects". Once everything is selected click on "Next" and you will be prompted to remove all the objects. Click "Ok".
8. Everything should now be removed and you can close Ad-Aware.
